

SECRETOXC-0905-60
COPY 5 of 5

26 September 1960

MEMORANDUM FOR: HQ, USAF
AFCIC-5

ATTENTION : Major Honeywell

SUBJECT : Provisioning, "Q" Program

25X1A

1. In order to avoid duplication and to expedite provisioning, it is suggested that the machine-run listing provided by the [REDACTED] dated 9 September 1960, be utilized to indicate action required by different elements participating in the procurement program. In those cases where Headquarters is indicated as the action Agency, it is requested that your office take the necessary action to screen Department of Defense listings to determine: first, excesses; secondly, on the shelf items; thirdly, current contracts on to which a rider could be established for the purpose of economy. Should any requirement not meet the aforementioned criteria, it is suggested that your office inform this office to the effect that none of the aforementioned requirements can be met. Based upon this notification this office will take necessary action to instruct the Project Depot or the contractor involved to purchase.

2. There is no intent to exert pressure on any agency of the Defense Department to procure items which will, in the end, be detrimental to a current program within their own department.

3. In an extreme minority case, due to the security factor, it may be necessary to request a priority on a Department of Defense project which may prove detrimental. Should this be the case, this decision will be accepted as to the necessity for subsequent action.
